

PIPE AND DUCT WRAP BY ISOSTORE [DAMPING PAD]

Sheet Metal

Sheet Metal

Wrap Applied

Our Pipe and Duct Wrap is a versatile vibration damping pad that is highly efficient at damping lightweight hard surface materials. We have designed this product to dampen the vibrations transferring through any plastic or metal surface just over 1/8" surface thickness. It is most commonly used to wrap plastic drain pipes and sheet metal ductwork, but can adhere to any smooth lightweight surface to reduce, and often eliminate, sound transfer through the material. Other applications include vehicle interiors, machinery, furnaces, and appliances.

The black side of each isolation sheet is a self stick butyl that will easily attach to pipes, duct, and other clean smooth surfaces without additional fasteners. The opposite side of the vibration dampening pad is a reflective aluminum constrained layer with a finish similar to

- **TOP PERFORMANCE**

There is no damping pad that can dampen more efficiently than our Pipe and Duct Wrap. This is a private label version similar to name brand versions that sell for several times the cost of our wrap.

- **EASY APPLICATION**

Simply cut to size with a razor knife, remove the release paper, and apply the black butyl side fully to the plastic or metal. No air bubbles or wrinkles should be visible.

- **HEAVY MATERIAL, NO FILLERS**

The weight of our wrap is almost 1 pound per square foot. It provides the mass of MLV and the damping of Green Glue Compound for high efficiency in damping vibrations.

TECHNICAL DATA FOR PIPE AND DUCT WRAP

DIMENSIONS	19.5" x 31.5", 4.25 square foot coverage
THICKNESS	1/16" (2mm)
WEIGHT	3.5 LBS
SERVICE TEMPERATURE	-40°F to 300+°F (-40°C to 149°C)
SHELF LIFE	Longer than 1 year
MATERIAL	Stamped aluminum adhered to black butyl rubber
SOLIDS BY WEIGHT	100%
PERFORMANCE	Triple damping performance with double layer
INSTALLATION	Cut with a box knife, remove release paper, and apply tight to the surface
LIMITATIONS	This material does not dampen material thicker than 10 gauge (.14 inches)
